

## Printable Ring Size Tool

### INSTRUCTIONS

1. Cut out the finger sizing tool along the dotted lines. Fold along the solid horizontal line.
2. Starting with the right edge, wrap it tightly around your knuckle, the knuckle just above where you want to wear the ring. Wrap it as tightly as possible, taping the right edge of the sizing tool to your finger if necessary. Do the same where you want to wear the ring, i.e. the base of your finger.
3. Take the larger of the two numbers. This is your ring size.
